

Southwest Highlands

Including Ben Nevis, Glen Coe and the rest of Lochaber, Argyll including the Isles, Loch Lomond, Trossachs and Arran

Forecast valid from 00:00 on Monday 08 Nov 2021 until 23:59 on Tuesday 09 Nov 2021

Forecast Issued on Sunday 07 Nov 2021 at 16:41 by Met Office Aberdeen

Confidence: High through until Thursday then increasing uncertainty due to doubts over northward extent of rain and the track of an area of low pressure.

Headline for Monday 08 Nov 2021: Bright start but becoming cloudy with occasional rain. Strengthening southerly winds.

Forecast for Monday 08 Nov 2021

Weather: Some long clear spells at first but cloud increasing from the west through the early hours with patchy mainly light rain reaching the far west towards dawn. Then a cloudy morning with outbreaks of rain spreading east, the rain becoming more persistent and occasionally heavy, especially across Argyll and Lochaber, through the afternoon and evening.

Chance of cloud free mountain/hill tops above 800m: Close to 100% at first in east, otherwise nearer 25% but falling close to zero in west by midday.

Visibility: Periods of persistent cloud developing above about 600-750m, falling to 300-450m in the west by midday. Otherwise visibility good falling to several kilometres in rain.

Met Office Aberdeen Meteorologist's View

Valley temperatures may dip close to freezing in east for a time overnight and reach plus 15 Celsius by day. Significant chill expected over higher summits. Winds may gust close to 65mph over ridges and summits.

Forecast for Tuesday 09 Nov 2021

Weather: Cloud and outbreaks of rain clearing around dawn to leave a bright morning with sunny spells developing. A few showers are expected through the afternoon, these may become wintry on the Munro's.

Maximum wind: Southwesterly 25-30mph turning a little more westerly and gradually easing 20mph. Still a risk of noticeable chill effect over higher mountains.

Chance of cloud free mountain/hill tops above 800m: Little chance overnight becoming close to 100% for a time soon after dawn, before chances fall to around 75% through the morning.

Visibility: Periods or persistent cloud above 300-450m through the early hours clearing soon after dawn with occasional cloud above about 600m developing. Otherwise visibility several kilometres in overnight rain becoming very good but falling briefly close to a kilometre in any summit snow showers.

Temperature: **Glens:** Around plus 7 or 8 Celsius at dawn rising to plus 11 or 12 Celsius by day.

At 800m: Plus 3 or 4 Celsius.

Freezing level: Above the summits falling to around 1200m around dawn.
